HARLEY-DAVIDSON® AUDIO POWERED BY ROCKFORD FOSGATE®

Get ready to be blown away by a sonic storm. Harley-Davidson Audio powered by Rockford Fosgate® is designed to be the new standard of motorcycle audio performance and customization. Harley-Davidson and Rockford Fosgate have worked together to create the highest performing, most advanced audio system riders have ever experienced. This is truly Legendary Sound from two legendary brands.

Stage I Speakers

Amplify your audio experience with Harley-Davidson Audio powered by Rockford Fosgate® Stage I speakers. These high-performance two-way speakers feature a durable injection molded woofer and a separate bridge-mounted tweeter. Each speaker is rated to handle up to 75 watts of power, and with two amplifiers up to eight speakers can be installed in a single system. Designed to fit perfectly in the Original Equipment speaker housing. These speakers deliver a significant upgrade in sound quality and power over the Original Equipment components. Harley-Davidson audio powered by Rockford Fosgate® speakers feature a two-year warranty. Complete kit includes Left and Right speakers and grilles.

Stage II Speakers

Step up your motorcycle audio experience. Harley-Davidson Audio powered by Rockford Fosgate® Stage II speakers deliver ultra-clear highs, super clean mids, and ground thumping bass. These amplified three-way speakers feature a durable injection molded woofer and a separate bridge-mounted midrange and tweeter speakers. Each speaker unit is rated to handle up to 150 watts of power and designed to deliver outrageous volume with less distortion for amazing sound even at highway speeds. With two amplifiers up to eight Stage II speakers can be installed in a single system. Designed to fit perfectly in the Original Equipment speaker housing, each kit includes Left and Right speakers and custom grilles with a bright aluminum badge.

Stage III Speakers

Feel the ultimate in audio power. Harley-Davidson Audio powered by Rockford Fosgate® Stage III speakers deliver ultra-clear highs, super clean mids, and ground thumping bass. Most powerful speakers ever offered by Harley-Davidson increase bass and volume with a simple speaker swap. Element Ready™ design is purpose-built for the harsh motorcycle environment to stand up to water, dirt, UV, and motorcycle vibration, to help ensure that your audio system will stand the test of time. Vibration-tested 6.5" waterproof 2-ohm speakers feature injection molded woofer cones with a massive high-flux Neodymium N48 magnet and 20mm Tweeter and 30mm Midrange speaker. Each speaker unit is rated to handle up to 250 watts of power and designed to deliver outrageous volume with less distortion for amazing sound even at highway speed. Includes Performance Red Stage III trim rings and grille inserts.

STAGE I/II/III FEATURES:

R-Tune

Equalization is specific to the motorcycle environment, designed from the ground up to be stronger and louder, to overcome road rumble and wind noise. Left and right speakers are designed to project sound directly at the rider for an enhanced audio experience.

BME (Bass Management Enhancement)

Designed to produce more bass, no matter the volume. The active amplifier DSP continually adapts to speed and road noise and maximizes the speakers' bass output to create powerful bass at any volume or speed.

IDHS™ (Inductive Damping Heat Sink)

The speaker fins push heat away from the voice coils to reduce speaker temperature and distortion to produce the clearest-possible audio.

ICC+

The Integrated Concealed Crossover boasts a hyper-efficient design and produces the clarity and output usually only found in traditional component speaker set-ups, plus the design allows for a quicker install.

The Harley-Davidson® powered by Rockford Fosgate® App

Install and fine-tune the system yourself. Smart-Install makes initial installation and upgrades incredibly fast and easy. The Harley-Davidson powered by Rockford Fosgate® App even adapts for each new speaker added to the audio system and tailors the audio experience automatically.

M-DEQ™ (Motorcycle Dynamic EQ)

Our smart amplifier adaptively changes the EQ points in real time, meaning the tune changes to ensure incredible sound quality no matter the motorcycle speed or riding conditions.

Full Range Class-D Technology

More power and less electrical fatigue. These high-efficiency amplifiers produce class leading power and don't over-draw on the motorcycle electrical system.

Bridge Mounted Design

The offset speaker design eliminates acoustic reflection and maximizes audio output. The specific left and right Tweeters are aligned to the motorcycle rider's position – sound is always directed for an optimal on-road audio experience.

HARLEY-DAVIDSON® AUDIO POWERED BY ROCKFORD FOSGATE® AMPLIFIER

Powerful, intelligent amplifier technology engineered to perform in the demanding motorcycle environment. This new, compact amplifier is easy to install in the motorcycle saddlebag. R-Tune: Equalization is specific to the motorcycle environment, designed from the ground up to be stronger and louder, to overcome road rumble and wind noise. Left and right speakers are designed to project sound directly at the rider for an enhanced audio experience. M-DEQ™ (Motorcycle Dynamic EQ): Our smart amplifier adaptively changes the EQ points in real time, meaning the tune changes to ensure incredible sound quality no matter the motorcycle speed or riding conditions. BME (Bass Management Enhancement): Designed to produce more bass, no matter the volume. The active amplifier DSP continually adapts to speed and road noise and maximizes the speakers' bass output to create powerful bass at any volume or speed. Computer Controlled Digital Signal Processing: Smart control, agile configurations. This intelligent amplifier continuously adapts to your speaker set-up. When you step up to the next audio stage or add additional speakers, the amplifier adjusts signal and output and is ready to deliver the sound quality and SPL you demand. Full Range Class-D Technology: More power and less electrical fatigue. These high-efficiency amplifiers produce class leading power and don't over-draw on the motorcycle electrical system. Ridiculously Rugged: Built stronger and ready to go anywhere. This amplifier was designed and tested over 80 hours to perform in the harshest conditions, no matter the heat or environment. So, anywhere you and your bike can go, our amplifiers can too. Rated Power: 50 watts per channel x 4 @ 4ohms; 100 watts per channel x 4 @ 2ohms Dimensions: 8.13" x 5.39" x 2.01"

Boom!™ Audio – '14-later Touring

A. BOOM!™ BOX GTS RADIO KIT

Equipped with a lightning-fast processor for quick start-up and route calculation and with even more memory than previous Boom! Infotainment Systems, the new Boom!Box GTS Infotainment System is an evolved interface experience. Available for riders of select Touring model motorcycles, the Boom! Box GTS Radio offers a contemporary look and feel while offering the latest mobile devices and tablet functionality but with durability and features designed specifically for motorcycling. Every element has been optimized to enhance the rider's interaction with the motorcycle and connectivity with the world to ultimately improve the Touring experience. The entire GTS system can be managed from the motorcycle hand controls. It's 6.5" GTS touchscreen is the same size as the 6.5 GT screen but all mechanical buttons and the plastic bezel are eliminated, providing a flat screen. The durable touchscreen glass performs even when used with touchscreen gloves and offers the lowest reflectivity available with minimal sun washout for exceptional visibility in all situations.

B. BOOM! BOX 6.5GT RADIO KIT

The Boom! Box 6.5 GT Infotainment System is the ideal upgrade for Touring models equipped with the standard Boom! Box 4.3 radio. One look at the brilliant 6.5" display and you know that this is something special. Boom! Box 6.5GT features a low-distortion 25-watt/channel amplifier that has been optimized for great sound in an open-air environment. The result is cleaner, sharper sound at volumes up to 25% louder than previous Original Equipment radios. Built-in automatic volume control compensates for the increased noise levels as speed increases and automatically adjusts the bass and treble for optimal performance.

The feature-packed radio is factory-equipped with AM/FM radio, weather alert, integrated iPod® and USB audio device playback, map-based GPS navigation and Bluetooth® pairing of mobile phones. The 6.5GT features can be accessed via the glove-friendly touchscreen, joystick hand controls or with hands-free voice recognition. And it doesn't stop there. Optional Bike-to-Bike communication, SiriusXM® satellite radio, XM weather and traffic services and other features are also available.

C. WIRELESS HEADSET INTERFACE MODULE

It's time to cut the cord with your bike. Now available for '14-later Touring and Trike models equipped with Boom!™ Audio 6.5GT and GTS Radios, this Wireless Headset Interface Module (WHIM) lets you communicate with your bike without being wired to it. The WHIM Bluetooth® adapter permits wireless connectivity to the 6.5GT infotainment system, allowing you to communicate via CB radio, hear turn-by-turn GPS directions, listen to your favorite radio stations and so much more all through your Bluetooth-enabled headset.

Bluetooth® Wireless Technology

Wireless interface permits full access to the Infotainment features without the hassle of being connected to the bike. You have full freedom of movement for turning your head and getting off the bike at fuel stops.

Integrated Into the 6.5GT and GTS Radio

Seamlessly use all wired headset functionality (CB, Phone, Intercom, Navigation, Radio) without the compromises of aftermarket systems, and configure your Boom! Audio 20S headset directly from the radio controls.

Superior Audio Quality

Harley-Davidson® headsets feature proprietary software that delivers superior audio quality with stereo output compared to non-Harley™ headsets, which provide a mono sound output.

Dual Headset Connectivity

Two Bluetooth-enabled headsets can be connected to one WHIM, simplifying installation and keeping costs in line.

Integrated Behind the Fairing

Module mounts behind the fairing and connects directly to the radio, eliminating external wires and connections to console and Tour-Pak® communication ports.

Compatible with H-D™ Wireless Headsets

Current H-D wireless headsets are completely compatible. No need to purchase new headsets to use the WHIM system. Harley headset volume can be adjusted from the motorcycle hand controls.

Impact of Retrofit on Wired Microphone Functionality

Upon installation of the WHIM, your motorcycle's wired microphone functionality will no longer be available. However, wired audio will continue to function as before.

76000768

Fits '14-'25 Touring (except '23-later FLHXSE, FLTRXSE and '24-later FLHX, FLTRX and FLTRXSTSE and '25-later FLHXU) and Trike models equipped with a Boom! Box 6.5GT or Boom! Box GTS audio system. '14-'17 models require the separate purchase of Wireless Headset Interface Module Harness P/N 69201726. Installation on models may result in reduced satellite radio reception. Headsets

A. BOOM!™ AUDIO FULL HELMET PREMIUM MUSIC AND COMMUNICATIONS HEADSET

Great-sounding foam-covered stereo earphones comfortably fit into ear pockets in the helmet and the fine wires are easy to hide beneath the helmet liner for a clean installation. The quick-disconnect plug allows you to step away from the motorcycle without removing the helmet and the coiled cord permits freedom of movement in the saddle. The 7-pin DIN plug can be connected to the front and rear communications ports, allowing both rider and passenger access to the music, navigation and voice communications features of your motorcycle and the microphone has been optimized for superior clarity when connected to Harley-Davidson intercom and Bike-to-Bike communications equipment.

77117-10

Fits '98-'25 FLHT, FLHTCU, FLHTCUSE, FLHTK, FLHTKSE, FLTRU, FLTRUSE and FLHTCUTG models with a Boom!™ Box audio system (except models set up for wireless headsets). Also fits with vehicles equipped with Communication Switch Kit P/N 77173-08 or Boom! Audio Music and Intercom Kits.

A. BOOM! AUDIO FULL HELMET PREMIUM MUSIC AND COMMUNICATIONS HEADSET

B. EXTENDED LENGTH COMMUNICATIONS HEADSET CORD

Extended Headset Cord is an essential option for a tall rider or passenger. When compared to the stock headset cord, this cord provides an additional 5" of length at rest and up to 22" of length when fully stretched. The additional length and relaxed twist of the cord reduces the spring effect and the included clothing clip eliminates the tension that can lead to neck fatigue. The 7-pin DIN plug can be connected to the front and rear communications ports, giving both rider and passenger access to the music, navigation and voice communications features of your motorcycle. This cord is a direct plug-in replacement for the standard length headset cord on the Original Equipment headset or the Boom! Audio Full Face Helmet Communications Headset P/N 77117-10.

76000259

Fits '10-'25 Original Equipment Ultra-style Headsets P/N 77147-98A (Domestic) or 77156-98A (HDI), Boom! Audio Full Face Helmet Communications Headset P/N 77117-10 and Half Helmet Headsets P/N 76000145 and 76572-09. A. BOOM! AUDIO FULL HELMET PREMIUM MUSIC AND COMMUNICATIONS HEADSET

C. BOOM! AUDIO HALF HELMET MUSIC AND COMMUNICATIONS HEADSET

Lightweight, durable neck bow wraps around the ear and across the back of the neck and fits comfortably below the shell of most half helmets. The adjustable boom microphone with wind sock has been optimized for superior clarity when connected to Harley-Davidson® intercom and Bike-to-Bike communications equipment and the quick-disconnect plug allows you to step away from the motorcycle without removing the headset. A clothing clip (not shown) is included for added comfort and reduced ear fatigue. The coiled cord permits freedom of movement in the saddle. The 7-pin DIN plug can be connected to the front and rear communications ports, allowing both rider and passenger access to the music, navigation and voice communications features of the motorcycle.

76572-09 7-pin DIN Connector.

Fits '98-'25 FLHTCU, FLHTCUSE, FLHTK, FLHTKSE, FLTRK, FLTRU, FLTRUSE and FLHTCUTG models. Also fits with vehicles equipped with Communication Switch Kit P/N 77173-08 or Boom! Audio Music and Intercom Kits.

Antennas

D. HIDDEN AM/FM/WB ANTENNA

Hide the AM/FM/WB antenna inside the fairing for a clean, uncluttered look. Uniquely tuned to the Harley-Davidson® radio, this enhanced Hidden Antenna offers reception performance equivalent to the Original Equipment whip antenna and superior to the Shorty Antenna. Perfect for your clean slick custom bagger, this Hidden Antenna is also the ideal addition to models equipped with H-D® Detachables™ Tour-Pak® luggage because it eliminates the need to move the whip antenna back and forth between Tour-Pak luggage and fender mounting locations. Kit includes all required mounting hardware and wiring.

NOTE: Relative antenna performance as compared to stock Original Equipment antenna; results based on reception evaluation conducted in Milwaukee area. Actual performance will be influenced by signal strength and electrical interference in your area. Follow the installation and routing instructions carefully to obtain the best possible performance from the antenna.

76000862

Fits '14-'25 Touring (except '23-later FLHXSE, FLTRXSE and '24-later FLHX, FLTRX, FLTRXSTSE and '25-later FLHXU) and Trike models with Boom!™ Box Audio System.

Speedometers/Tachometers

COMBINATION SPEEDOMETER/TACHOMETER

Maintain the clean view over the handlebar. This unique Combination Speedometer/Tachometer allows you to monitor engine speed without adding handlebar-mounted gauges. The unit mounts in the stock dash opening and is a direct plug-in installation. The backlit gauges include a large LCD (liquid crystal display) information screen that displays odometer/trip meter data, miles-to-empty readings, an easy-to-read segmented fuel display, a gear position indicator, clock and on '20-later Road King® models Traction Control, Rain Mode, Hill Hold and TPMS icons where available. This valuable information is available to the rider at a glance. The gauge features push-button adjustable backlighting with over 600 color tone options, allowing the rider to adjust pointer, LCD and backlighting colors to match any paint scheme or viewing preference.

NOTE: As a result of different Original Equipment capabilities, the following exceptions apply: Traction Control, Rain Mode, Hill Hold and TPMS functions are only available on '20-later Road King® models. Gear position not available on '04-'07 models. Fuel functions are not available on '04-'06 XL, '04-'08 Dyna®, '04-'07 Softail® and '04-'07 Road King models. Gauges feature speedometer and tachometer pointers that sweep clockwise to provide a "gauge within a gauge" look. Kit includes a data transfer cable to easily upload initial mileage at time of installation.

F. ANALOG SPEEDOMETER/TACHOMETER – 5"

Gauges feature speedometer and tachometer pointers that sweep clockwise to provide a "gauge within a gauge" look. Kit includes a data transfer cable to easily upload initial mileage at time of installation.
