Hand Grips – Heated

HEATED HAND GRIPS

Keep comfortable on those cool mornings or frigid night rides. Warm hands have a major impact on overall body comfort and sometimes gloves just aren't enough. These thermostatically controlled grips feature variable heat settings controlled with a military-grade resistor and use automatic temperature monitoring to adjust to ambient temperatures. With both hands on the grips, they will remain at a constant temperature regardless of changes in outside temperature. The self-contained control circuit and control knob means you have no additional switches or controller boxes to mount and the grips are switched on/off with the ignition to avoid draining your battery. The glueless grip design allows grip removal if you change handlebars or motorcycles.

COMFORT, STYLE OR BOTH?

Every person is unique. Your overall height, arm reach, upper body length and riding style all dictate your relationship to the bike's controls. Add in the desire for a unique, custom look and your handlebar options multiply exponentially.*

REACH® HANDLEBARS

Recommended for shorter riders, Reach Handlebars are shaped to position the hand controls closer to the rider for optimized elbow and wrist position.

TALLBOY® HANDLEBARS

Recommended for taller riders, Tallboy handlebars enable long-armed riders to more comfortably fit and maneuver the motorcycle.

YOUR RIDING POSITION

DRAG HANDLEBAR*

Narrow, flat and more aggressive, drag bars provide a straight elbow and neutral hand and wrist position. For maximum comfort, drag bars can be positioned with curved or straight risers to minimize stretch to the controls.

BEACH HANDLEBAR*

Low and wide, a beach bar spreads your arms and gives you room to breathe. Ideal for the rider with long arms, beach bars can be a little too wide for many riders. While selecting a bar, make sure you can reach the hand controls when the handlebar is fully turned.

APE & TALLBOY HANDLEBAR*

Tall and wide, ape and Tallboy handlebars provide a classic "fists-in-the-wind" look and can add long-haul comfort for riders with long arms. Because handlebar height is regulated in many areas, check local laws before installing a tall handlebar.

CHIZELED HANDLEBAR*

For cutting edge style, a Chizeled Bar combines the hands-up feel of a mini-ape with the narrow width of a drag bar. The bar's shoulder-width design keeps the elbows in and the arms straight ahead, and the wrist and hands fall in a neutral palms-down grip.

CHOOSING YOUR HANDLEBAR

RISE is the vertical distance between a handlebar's tip and its base. Adding risers to bars that sit too low can help put hand grips into your sweet spot.

PULL BACK is the distance the handlebar tips come back toward the rider. Greater pull back can eliminate the long reach to the bar for a shorter rider.

WIDTH is measured from tip to tip. Make sure the bar isn't too wide so it pulls your hands off the grips when turning.

KNURL CENTER is the distance between the center line of the bar's knurling. The measurement should match the riser dimension to maximize clamping pressure.

*NOTE: Installation of some handlebars and risers may require a change in clutch and/or throttle cable and brake lines for some models. Handlebar height is regulated in many locations. Check local laws to ensure your motorcycle meets applicable regulations.
**1.25" Fat Bar base necks down to fit 1.0" handlebar clamp.

CHOOSE YOUR BATWING HANDLEBAR

Just about every model of Harley-Davidson® motorcycle features a different stock handlebar. Selected to complement the style or use of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.

Choosing a bar for your batwing fairing-equipped model is about more than just style – it's about how you approach the road. Where the bar positions your hands, wrists and arms directly affects how you feel on your motorcycle. For every set of bars, there are three factors at work: rise, pull back and width. These three measurements determine your reach to the hand controls and, therefore, your overall feeling of comfort and control.

Handlebars – Batwing

A. BATWING REACH® HANDLEBAR*

The Batwing Reach Handlebar is shaped to provide all-day riding comfort for smaller-stature riders. Extensively tested by a panel of riders who stand 5'-1" to 5'-5" tall, the Reach Handlebar was ergonomically designed to provide the ideal combination of shoulder position, elbow bend and wrist angle. The bar brings the grips closer to the rider, and features a narrower width, lower height and flatter hand position. The narrow profile also brings the hands in toward the center of the vehicle for easier maneuvering.

Combining a Reach® Seat with a Reach Handlebar provides a smaller-stature rider with an optimized rider triangle and a complete fit solution.

Fits '09-'24 Electra Glide®, Street Glide® (except '23-'24 FLHXSE and '24-later FLHX), Ultra Limited® (except '10-'13 FLHTK) and '09-'23 Trike models (except Freewheeler®). Also fits '17-later FLHTKSE and FLHXSE models. All models require separate purchase of additional components. Street Glide models and models with fairing-mount mirrors require separate purchase of handlebar-mounted mirrors and Fairing Plugs. Does not fit with stock heated grips or accessory Black Rubber Heated Hand Grips P/N 56100034.

B. BATWING TALLBOY® HANDLEBAR*

The Batwing Tallboy Handlebar is shaped to provide a tall rider with the ideal combination of shoulder, elbow and wrist positions for a long day in the saddle. The Tallboy handlebar was extensively tested by a panel of riders between 5'-11" and 6'-3" tall, resulting in a higher and flatter hand location. The bar also stretches the elbow to a natural angle, and reduces the cramped look often seen in riders with long arms.

Combining a Tallboy® Seat with a Tallboy Handlebar provides the rider with an optimized rider triangle and a complete fit solution.

Fits '09-'24 Electra Glide, Street Glide (except '23-later FLHX and FLHXSE), Ultra Limited (except '10-'13 FLHTK) and '09-later Trike models (except Freewheeler). Does not fit CVO models.
